

TRANSCRIPTION SOFTWARE

- **The Philips SpeechExec Pro Transcription Set**

The Philips SpeechExec Pro is a powerful and user-friendly digital transcription system that turns your computer into a highly sophisticated transcription machine. Providing a whole range of benefits to the busy transcriptionist, the software streamlines communications and allows you to organize recordings clearly and transparently. Together with a set of ergonomic accessories, SpeechExec Pro Transcription Set is the solution that sets the pace in today's fast-moving business world.

- **iChannel Express Transcription Set**

iChannel Express is a standalone transcription program. Dictation can be stored on a network share or your own computer. It is the perfect solution for smaller law firms and medical offices where a powerful, yet low cost transcription package is needed.

- **iNet 3 – Phoenix Dictation System Transcription Set**

iNet 3 is a software transcription solution and works with the Voice Solution Phoenix dictation system. With its user-friendly interface and video tutorials, iNet 3 is easy to learn and integrate into your existing infrastructure. Whether on the local network, through a VPN, or over the internet, iNet provides complete mobility when it comes to transcription. Your data is encrypted and user profiles have adjustable access permissions to ensure that company or HIPPA security policies are met.
