

## DICTATION

Since 1947, we have supplied our customers with equipment for analog and digital dictation. We are a one-stop shop for all of your voice needs. You can purchase equipment, supplies, and parts, as well as come to us for repairs and maintenance. Whatever your business needs, we have a solution for you.

- **Philips Digital Recorders**

The Philips Pocket Memo dictation recorder takes dictation to a new level. The SpeechExec Pro software organizes the workflow of dictation files and resulting documents between author and transcriptionist, and allows you to monitor the status of your work. These Philips units give you the freedom to work when and where, so location is no longer an issue.

- **PC Dictate II**

PcDictate II allows you to easily record dictation to your computer using a variety of microphone options. The popular Philips SpeechMike series is supported as well as the FP-110USB foot control for hands-free dictation. PcDictate II has a powerful feature set that makes many routine tasks automated and simple to perform. The end result is crisp digital audio with a setup that fits your individual needs perfectly.

iChannel Express and many other third-party transcription applications can play PcDictate II's standard audio Wave files. This allows PcDictate II to easily be integrated with existing infrastructure. One of the best features, though, is the full integration with the Voice Solutions Phoenix server, where all application preferences are configurable server-side.

- **Telephone Call-in Systems**

Now anyone can enjoy this convenience at an exceptionally affordable price. Up to four telephony channels can be ran off of a user's existing computer, via a USB port. Dictate from a landline phone, DID extensions, cell phone, or even a hard-wired dictate station. Uses industry standard Wave format for compatibility with most third-party transcription solutions, including DAC's iChannel Express.
